DM220i™
digital franking machine

Make your postal budget go further

The DM220i digital franking machine provides detailed web based postal spend reporting to help you take control of your expenditure

It can also print a return address on your envelope, so undelivered mail gets returned. This quickly improves the accuracy of your mailing database and reduces expenditure on subsequent marketing campaigns.

Even when not in use, it minimises your costs. After a period of inactivity, it automatically enters a low-power sleep mode, so minimising your energy bill.

Save money every day
The DM220i digital franking machine franks the correct tariff on each letter and parcel every time, so postage costs are kept to a minimum.

Suitable for even the smallest office
This compact machine sits unobtrusively on a desktop and its integrated weighing platform (up to 5kg), means there's no need for separate scales. It operates with minimal noise, so won't disturb other activities taking place nearby.

A flexible solution
It effortlessly processes up to 45 pieces of mail a minute and handles mail up to 9.5mm thick. Larger items are processed using tape strips.

There's no need to sort mail into separate weights and sizes. It will apply the correct tariff to each item as it's removed from the weighing scales. An optional weighing platform allows you to weigh items up to 35kg.

Easy to use
The interactive menus displayed on the control panel are intuitive and simple to use. They're backed up by user-friendly instructions that lead even someone who's never franked mail before through each stage of a task.

Manage your time effectively
Up to five presets minimise preparation time for common jobs. And you can advance the date and prepare mail ready for sending later in the week - perfect if you've time spare today and a hundred and one things that need to be mailed out tomorrow.

The Benefits of MailMark™
This product is MailMark™ compliant. Digital Mailing Solution customers have access to all the numerous features and benefits that MailMark™ can offer such as:

- Automated tariff updates eliminate surcharges

Print promotional messages on every envelope you frank
Turn your mail into a powerful revenue-generating tool

Get your mail opened and read
Printing a promotional message on every envelope you frank ensures your mail is more likely to be opened and read ahead of mail sent by your competitors. On top of this, our advanced ink-jet technology produces a professional impression every time. It's a simple and cost effect way of letting customers and potential customers know your company has high standards.

Stay connected
Being connected to via IntelliLink™, means you have constant access to an invaluable suite of services such as re-crediting, envelope messaging, postal tariff changes and software upgrades.

Know the facts
Applying a date and time stamp to incoming mail as its received avoids any confusion about when an item was received.

Monitor costs
INVIEW™, our web-based, easy to use, accounting feature allows you to:
- Have visibility of your postage expenditure by class, format and department
- Extract information and present simple graphical analysis
- Track up to 100 accounts so you can bill clients or cross charge between departments
- Monitor spending to identify waste e.g. overuse of first class or large letter format

No more queuing for stamps
Re-credit your machine at the touch of a button. And get up to 55 days free credit by taking advantage of Purchase Power, our post now and pay later service. This also allows you to consolidate supplies and maintenance invoices onto a single monthly statement so minimising your administration costs.

A gateway to the future
The DM220i's digital meter indicia satisfies all current postal regulations, and the technology's flexibility makes the DM220i adaptable for the future.

Summary
A compact machine that processes mail quickly and efficiently. Can print marketing messages on every envelope you frank.

Connectivity
The DM220i is Mailmark™ compliant. Your system should be connected via a network or WiFi to allow for automated updates and data uploads to Royal Mail (as per the Royal Mail Franking Scheme). Analogue telephone connections are no longer suitable for Mailmark™ systems. An alternative connection is available through a PC. However, this method does not allow automated updates.
