FPi 4700

Folding inserting excellence

Time saving and cost effective

Simple and easy to operate

Fold, insert and seal envelopes

Intelligent operation

High Volume inserter

This folder inserter has a high capacity feeder; processing 3,800 envelopes per hour and allowing for continuous output. It can process a variety of mail such as marketing campaigns, invoices, monthly statements and much more.
The FPi 4700 fits perfectly into any work environment with its compact footprint and easy to use colour touchscreen.

MIXED MAIL INTELLIGENCE

Using OMR, the FPi 4700 can collate up to 10 pages for the same recipient. It's multiple stations make document processing with varying inserts easy. The intelligent technology ensures communications are secure throughout production, making it ideal for confidential mail.

FLEXIBLE CONFIGURATION

The full capacity can be doubled when more than one station is in use. Alternately filling the stations guarantees virtually non-stop processing.

Specification

Document feed width | 130mm x 230mm

Document feeder height | 90mm x 356mm

Paper weight | 60gsm to 250gsm

Pre-fold enclosures | H 90mm - 162mm
W 130mm - 230mm

Folding capabilities | up to 10 sheets (80gsm)

Maximum insert thickness | 2mm

Feeder capacity | 325 sheets (80gsm)

Insert capacity | up to 25 sheets A5 (unfolded)

Envelopes | C6, DL, C5

Envelope feeder capacity | 250

Insertion speed | 3,800 per hour

Programmable memory | 20 jobs

Dimensions | 1260mm(L) 670mm(H) 460mm(D)
